We gave Sue a tough assignment with a high level group of people for an audience. She did a superb job and received outstanding reviews. *7-Eleven Corporation*

We needed someone to assess why our machine shop was not functioning at a higher level of productivity. Sue came in, ran assessments, and consulted with each individual. At the end of the week, she conducted a team building off site, and we've had superior results ever since. The results have paid for Sue's services many times over! Highly recommend her. She's great!

The "Sales Behavioral Assessment Tool" has been most valuable for me in assessing the skills of candidates I have considered for hiring, or promotion. I have used many types of such tools over the years, and I have found this to be the best. The detailed analysis that it produces provides a rich, "independent" platform for discussions with candidates. I have also found it to be very accurate. In addition, I've used the tool for developmental purposes for my current staff. Sue, I also appreciate your professional responsiveness in helping me understand the results of the analyses, and therefore increasing the skill level and quality of my global marketing & sales team.
